REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art of record does not provide for, nor suggests providing for an iNIC (intelligent Network Interface Card) which is able to store an unattached connection endpoint once an initialization packet has been received and output a migration packet containing the information associated with the client, and remove the unattached connection endpoint from the temporary table in response to an acknowledgement indicating that the second computing device received the migration packet. Information in a forward table is used to represent a connection with the client, and request packet is then sent to the second computing device via encapsulation.
2. The closest prior art of record is Aversa, which discloses the system of migrating connections, however it is not done entirely within an iNIC utilizing temporary tables and forward tables of connections. The packet is received into the kernel of the device, and then it is decided if the packet can be processed locally or must be migrated to a different device.
3. For these reasons, in conjunction with the other limitations of the independent claims, puts this case in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Terminal Disclaimer

4. The terminal disclaimer filed on January 15, 2009 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of Patent no. 7,287,090 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Information Disclosure Statement

5. The IDS's dated November 3, 2008 and November 10, 2008 have been considered. See enclosed PTO-1449.
